

Compiled Rules for Detecting Finnish Floor Plan Images (Text-Only)

Below is the full, clean, consolidated rule-set including:

- **Room labels** (Finnish abbreviations)
- **Dimension and area patterns**
- **Finnish brochure / real-estate keywords**
- **Layout format patterns**
- **Floor numbers, apartment IDs**
- **Additional common markers**
- **Final decision rule**

1. Room / Space Labels (commonly found in Finnish floor plans)

Check if the OCR text contains **two or more** of these:

- OH – olohuone (living room)
- MH – makuuhuone (bedroom)
- H – huone (room)
- K – keittiö (kitchen)
- KT – keittotila (kitchenette)
- KPH – kylpyhuone (bathroom)
- KH – kylpyhuone
- WC – toilet
- ET – eteinen (hall/entrance)
- S – sauna
- VH – vaatehuone (walk-in closet)
- KHH – kodinhoitohuone (utility room)
- TK – tekninen tila (technical room)
- VAR – varasto (storage)
- P – balcony (often just the letter P)
- PARVEKE – balcony
- LASITETTU PARVEKE – glazed balcony
- TERASSI – terrace
- PARVI – loft/mezzanine

2. Dimension Patterns (very strong floor-plan indicators)

Typical Finnish room size notation:

- **X.xx m x Y.yy m**
(decimal point or comma accepted)

Examples:

- 3.64 m x 3.01 m
- 4,88 m x 3,86 m

3. Area Patterns (overall apartment size)

Look for:

- A number followed by **m²** or **m2**

Examples:

- 43,0 m²
- 58.5 m2

4. Floor-Level / Location Text

Common Finnish real-estate terminology:

- 1. kerros, 2. kerros, 6. kerros (floor/level)
- SIJAINTIKAAVIO (location diagram)
- POHJAKUVA (floor plan)
- HUONEISTO (apartment)
- ASUNTO (apartment)
- TALO (building)
- PINTA-ALA (surface area)
- PINTA-ALOJEN
- ASEMAPIIRROS (site map)
- PIIRUSTUS (drawing)
- SUUNTAA ANTAVA, EI MITTAAMASSA (directional, not exact dimensions)

5. Apartment identification patterns

Often shown in brochures:

- AS2, AS9, AS16, etc.
(AS + number)

6. Layout code patterns (very common in Finland)

These appear exactly like:

- 1H+KT
- 2H+KT+S
- 3H+K
- 2H+K+S

General structure is:

- **Number of rooms (H)** +
- **Kitchen type (K or KT)** +
- Optional **S** for sauna

7. Additional Finnish Indicators

These do not always appear but strongly reinforce the match:

- LASITETTU PARVEKE (glazed balcony)
- SUUNTA- words indicating orientation
- Scale bar numbers (e.g., 5 m, 10 m)
- Notes like "**EI MITTAAMASSA**" (not to scale)

Final Decision Logic (Text-Only Specification)

You should classify an image as a **Finnish floor plan** if:

A) Room labels bucket

OCR contains **two or more** Finnish room abbreviations
(OH, MH, K, KT, KPH, ET, S, P, etc.)

AND

B) Either Dimension bucket OR Information bucket

Dimension bucket:

At least one room-size pattern like:

- X.xx m x Y.yy m

OR

Information bucket:

At least **one** of the following:

- an **area** value (43,0 m², 58.5 m²)
- a **floor number** (1. kerros)
- an **apartment ID** (AS14)
- a **layout code** (2H+KT+S)
- a **brochure keyword** (SIJAINTIKAAVIO, POHJAKUVA, etc.)

Optional Strict Mode (for maximum accuracy)

Use stricter rules when you want **zero false positives**:

- Require **three or more** room labels
- Require **either**:
 - at least one dimension pattern **OR**
 - at least **two** information elements (area + layout code, etc.)
